RESEARCH AREAS

Computational Experimentation

Computational Modelling of Learning and Categorisation

ACADEMIC POSITIONS

2023 - Postdoctoral researcher. Developmental Computational Psychiatry. University of Tuebingen. (Advisor: Tobias Hauser)

2023 - Guest Scientist. Max Planck Institute for Biological Cybernetics.

2020 - 2023 Ph.D. Psychology. Plymouth University. (Supervisor: Andy Wills).

2021 - 2023 Visiting Lecturer, Tutor and Specialist. University of Plymouth.

2019 - 2020 M.Sc. Advanced Psychology. Plymouth University. (Supervisor: Patric Bach).

2019 - 2023 Teaching Assistant. University of Plymouth.

2017 - 2019 Research Assistant. (Line Manager: Andy Wills).

2017 - 2018 Research Assistant. (Line Manager: Marina Wimmer).

EDUCATION

2020 - 2023 Ph.D. Psychology. Computational Cognitive Science. *Straight Pass.*

2019 - 2020 M.Sc. Advanced Psychology. Plymouth University. *Distinction.*

2017 - 2019 B.Sc. Psychology. Plymouth University. *First.*

THESIS

Dome, L. (2023) *Testing the adequacy of formal models of an irrational learning effect.* University of Plymouth, UK.
Defended: 2023.09.12. <https://pearl.plymouth.ac.uk/psy-theses/74>

GRANTS AND AWARDS

2020 **Awarded** [Undergraduate Project Prize](#). Experimental Psychological Society / British Science Association.

2019 **Awarded** Doctoral Training Studentship (1+3). ESRC & SWDTP. £87,510.62.

RESEARCH SOFTWARE

-  **psp** *maintainer, developer* Implements an n -dimensional parameter space partitioning algorithm for evaluating the global behaviour of formal computational models as described by Pitt, Kim, Navarro and Myung (2006). 11K downloads. [\[source code\]](#) [\[cran\]](#) doi: [10.32614/CRAN.package.psp](https://doi.org/10.32614/CRAN.package.psp)
-  **cpm** *maintainer, developer* cpm is a fundamental python package for Computational Psychiatry. It is designed to provide a set of tools for researchers and clinicians to analyze and model data in the field of Computational Psychiatry. [\[source code\]](#)
-  **catlearn** *senior developer* Catlearn is an archive of formal models of categorization and learning, plus benchmark datasets to test them against. It currently houses 14 formal mathematical models of learning and categorization. I have contributed 8 models to the package. 45K downloads. [\[source code\]](#) [\[cran\]](#) doi: [10.32614/CRAN.package.catlearn](https://doi.org/10.32614/CRAN.package.catlearn)

INVITED TALKS

- 2024 *cpm*: a python library for theory-driven modeling in Computational Psychiatry. “Psychiatry Colloquium. University of Tuebingen. Germany.”
- 2021 Clearing confounds from the inverse base-rate effect: Irrationality and concurrent load. “2020 British Science Association / Experimental Psychological Society Undergraduate Project Prize Talk.” [\[video\]](#).
The role of base rates in categorizing ambiguity and forming stereotypes. “Liverpool John Moores University: Cognitive and Affective Neuroscience Group Seminar.”

CONFERENCE PRESENTATIONS

- 2023 45th Annual Conference of the Cognitive Science Society. Sydney, Australia.
- 2023 MathPsych/ICCM/EMPG: Amsterdam, The Netherlands.
- 2023 Meeting of the Experimental Psychology Society. Plymouth.
- 2022 22nd Associative Learning Symposium: Gregynog Hall, Wales, UK.
- 2021 Cognitive Science Conference: Online.
- 2019 The British Psychological Society: South West Undergraduate Conference. Plymouth, UK.
